

Appendix A

Ordinances / Information Bulletins / Application Forms

Ordinances

In addition to the zoning and building codes, city ordinances also play an important role in development. Ordinances are approved by City Council and are enacted as local law. All ordinance language can be found in the Livermore Municipal Code (LMC). The LMC is available in the reference section of each library or on-line at <http://www.codepublishing.com/CA/Lvmore.pdf> .

The following is a list of development related ordinances that you should be aware of when planning your project. If you have any questions about any of the following ordinances, Permit Center staff is available to assist you.

Residential Fire Sprinklers
Green Building
Residential Security

Information Bulletins

The Permit Center has developed a series of handouts that are designed to answer most frequently asked questions, show construction details of typical installations, or inform you of specific code sections and how they are applied. These forms can be obtained at the Permit Center or on-line at: http://www.ci.livermore.ca.us/permit_center/Handouts.html .

Application Forms

It seems like there is an application form for everything. To some extent, this is true but in many cases the forms are used to simply input information into the tracking system. But application forms are also an easy way to attach a great deal of information to a file or with a set of plans. Having a fully completed application form can help save you time when submitting. You can obtain application forms at the Permit Center or access the complete list of application forms on-line at http://www.ci.livermore.ca.us/permit_center/applications.html. Permit Center staff is available to assist you in identifying and completing the correct forms.
