Many Livermore residents enjoy fine food, fine wine -- and exercise to burn off the calories! It's part of our community culture. Read below for tantalizing tidbits about the new Airport Administration Building that houses a Chef Chacon restaurant. The Livermore Reads Together program features wine and France. After a night of good food and drink, make sure you are spotted at the Livermore Half Marathon instead of on the Police Department's new body cameras. Marc citymanager@cityoflivermore.net.

New Airport Building -- The opening of the new Airport Administration Building is on-schedule for early March. This new 8,400 square foot building replaces the existing "Dan Lee" Terminal Building and will feature a new restaurant and concession area and expanded meeting space. The Cafe/Coffee concession area should open in March while the new restaurant, Chef Chacon's Vineyard Table, is expected to open in May 2015.

Livermore Reads Together -- 2015 is certainly "A Good Year" and just happens to be the selected title for this year's Livermore Public Library annual program. "A Good Year" by Peter Mayle follows Max, a former British financier, when he inherits a winery in Provence, France. Enjoy the numerous programs, movies, and music that celebrate wine and France. There's even a Geocaching Adventure planned -- use your smart phone or GPS to locate clues and find treasure hidden somewhere in Livermore! For more details visit www.cityoflivermore.net/citygov/lib/

Livermore Half-Marathon--The second annual downtown Livermore Half-Marathon occurs Saturday, March 28th. The race begins at First St. and S. Livermore Avenue at 8:00 am. All runners must finish by 12:30 pm, and downtown special events will occur all weekend long. More race details, including registration and route map information, are available at www.runlivermore.com. Limited road closures in the morning are expected. Closure details will be released by the Livermore Police Department closer to race day.

New Police Department Body Cameras--The LPD recently purchased body-worn cameras for all police officers and detectives. These cameras will provide accurate documentation of encounters, improve digital evidence gathering, reduce time in court, increase successful prosecutions, streamline reporting, and serve as a training tool. Additionally, the cameras will provide more transparency and reduce liability claims. The cameras should be in use by the end of February 2015.
